Serial No. 09/378,318

Art Unit 1713

Claims 1-18 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

The claims remain indefinite in that it is unclear as to exactly how many components are to be incorporated into the composition. Applicants allege that one of ordinary skill in the art would appreciate the difference between the claimed hydrolysis product and the unhydrolyzed epoxy functional alkoxysilane. The Examiner maintains that such is not necessarily the case. The Examiner continues to maintain that a partially hydrolyzed product can read on both an unhydrolyzed alkoxysilane as well as the hydrolysis product of an alkoxysilane.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Funaki et al.

Serial No. 09/378,318

Art Unit 1713

The rejection as set forth under 35 U.S.C. § 103 is deemed proper and is herein repeated.

Applicants continue to argue that the Funaki patent fails to teach the ingredients as instantly claimed. This is not persuasive. Given the indefiniteness of the claim as well as the teaching of the partially hydrolyzed alkoxysilane as well as the incorporation of an unhydrolyzed organic silane compound, applicants' ingredients are rendered prima facie obvious. Applicants have failed to show or allege that the instantly claimed invention provides any unexpected results relative to the prior art. As such, the claims are rendered unpatentable.

The rejection as set forth under 35 U.S.C. § 103 over

Morrison or Tarshiani taken in view of Perkins et al. is herein withdrawn.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy, whose telephone number is (703) 308-2449. The examiner can normally be reached on Tuesday through Friday from 7:30 A.M. to 6:00 P.M.

The fax telephone number for this group is (703) 305-3599.

Any inquiry of general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-2351.

P. Mulcahy:cdc October 23, 2002 PETER D. MULCAHY PRIMARY EXAMINER
